

Marbled Easter Eggs

In this project we'll show you how to create colourful marbled Easter eggs. It's easy-peasy with the STABILO woodys 3 in 1. Combine different colours however you like and see what happens. In any case, it's really fun – and not just for Easter!

Here's how it works:

1. Take a blown-out egg and heat it a little all around with a hairdryer. Take care not to make it too hot – and mind your fingers!
2. Then colour the egg in a "scribble" style.
3. Blur the colours with kitchen roll. The warmth of the egg loosens the colour pigments, which makes it easy to spread the colour. If necessary, you can re-apply some colour. Repeat this process until you have the look you want.

Top Tip!

You can also use a paintbrush and a little water to brush the colour onto the eggs.

MATERIALS

- STABILO woody 3 in 1
- Eggs, blown out
- Hairdryer
- Kitchen roll
- Egg carton for storage
- Water and paintbrush
